

For nearly four decades, Lord & Company has partnered with clients to create, improve, and sustain industrial automation systems. As a turnkey systems integrator we provide controls engineering design, UL control panel fabrication, SCADA / RTU programming, HMI platforms, in-house and on-site training, start-up support, field service, and pre-bid and post-delivery documentation services.

Professional Engineers & Certified Project Management Professionals on Staff

UL-508A & UL-698 Certified Panel Shop

Established Cloud Based Control Systems (IIOT)

Field Instrument Calibration

RF Path Study Services

Custom Control Panels for Pump Controls & Many More Applications

1 of Only 104 CSIA Certified Systems Integrators in the World

More than 500 successfully completed water and wastewater projects

“I was so thankful to have Lord & Company in our corner, they could evaluate our situation and identify problems other integrators were having and solve them for us. We got our project taken care of in a few weeks rather than two years.” - Haren Construction Company

The foundation for a systems integrator to consistently deliver quality solutions is adherence to Best Practices in all areas of the business. Lord & Company became a Certified Member of Control System Integrators Association in 2007 and has been audited and recertified every 3 years. CSIA Certification removes the burden and risk from the client of auditing the business practices of the systems integrator.

Lord & Company employs best available technology by partnering with industry leaders in hardware, software, and equipment that our customers have come to rely on. Our programming team is proficient in all the most common platforms. However, when off-the-shelf solutions will not suffice our design team is capable and willing to create out-of-the-box solutions to meet our clients needs. In addition Lord & Company offers rugged and reliable packaged units such as the DRACS-RTU, SMS SCADA, and 2+2 SCADA.

## Engineering Field Service

Lord & Company is proud to offer our experienced engineering services to serve you during your normal operations as well as plant shutdowns and emergencies. Our Engineering Team is staffed with talented PLC programmers, Software Engineers, Project Managers, Technicians & Field Service Engineers. Lord & Company has been CSIA Certified since 2007. CSIA Certification ensures industries everywhere have access to low-risk, safe and successful applications of automation technology.

### CAPABILITIES

**SCADA Systems / DCS, PLC & PAC Programming**  
**Established Cloud Based Control Systems IIoT**  
**UL-508A & UL-698A Control Panels**  
**Turn-Key Custom Automation Solutions**  
**RF Path Study Services**  
**Instrumentation & Controls**  
**Field Instrument Calibrations and Startup**  
**P.E. and P.M.P.'s on Staff**

### INDUSTRIES SERVED

Industrial - Water & Wastewater - Oil/Gas - Power- Transportation - Government Facilities

**STARTING & FINISHING WITH EXCELLENCE**
